Regional Container Lines Public Company Limited

PRESS RELEASE FINANCIAL RESULTS AS AT 30 JUNE 2008

Transportation of containers continued to grow steadily in the beginning of the second quarter of 2008 despite the anxiety over the US sub-prime mortgage crisis. In later part of the second quarter, demand in Europe showed some signs of slowing down and created concern whether the strength of Europe's robust growth could be sustained. On the other hand, demand in Mediterranean and Middle East remained very strong throughout the quarter. As the Group had expanded its feeder capacity in the Gulf, the Shipper Owned Container (SOC) liftings had benefited.

With additional presence in the Gulf region, RCL's SOC liftings improved by 15% at 405,629 TEUs in Q208 as compared to the same quarter last year. In Q208, China was continuously affected by the bad weather, resulting in a number of terminals in China having suffered serious port congestions which in turn caused a lot of service disruptions to shipping lines. The Group's Carrier Owned Container (COC) liftings were also affected. It only registered a growth of 7% at 356,245 TEUs as compared to the same quarter last year. Overall, total liftings of the Group recorded an 11% increase at 761,874 TEUs in comparison to Q207. SOC liftings for first half of 2008 rose 13% at 769,738 TEUs, and COC climbed up 6% at 681,777 TEUs, when compared to the corresponding period of 2007. The total liftings hit 1,451,515 TEUs, a 9% increase.

Total turnover for the second quarter before exchange difference and gain on disposal of vessels edged up 4% at THB 5,067 million. As US dollar continued to weaken against the regional currency in Q208, Thai Baht strengthened close to 8% against US dollar year-on-year. The Group's turnover hence suffered a loss in translation. Otherwise, the turnover should have been better. Other than this, rate for Intra-Asia trade held on well since Q108. The total turnover for the first 6 months before exchange difference and gain on disposal of vessels reflected a flat growth at THB 9,788 million as gain in Q208 was offset by a softer turnover in Q108.

Under normal circumstances, strong Thai Baht should provide a translation gain to the Cost of Freight and Operation as majority of the Group's US dollar expenses were being translated to Thai Baht. However, due to escalating bunker price, the full offsetting could not be achieved.

With a 11% increase in liftings, the Cost of Freight and Operation in second quarter 2008 was THB4,671 million, an increase of 19% as compared to the same quarter last year.

Major contributing factor to the increase in Cost of Freight and Operation was the bunker cost, which escalated in May and hit a record high in June. On the average, the bunker cost was more than 60% higher as compared to that of the same quarter in last year.-

Other cost items were in line with the improved liftings and increase in number of vessels under owned operation. For the first 6 months, the Cost of Freight and Operation was up by 12% at THB 8,760 million.

In Q208, the Group disposed two vessels which were delivered in 2005 and subsequently chartered back the same for a minimum period of 8 years. The disposal of these two vessels registered a gain amounted to THB673.6 million. In second quarter of this year,

the Group recorded a Gain on Exchange of THB24.3 million against a Loss on Exchange of THB7.8 million in the same quarter last year. As the gain on disposal of the vessels and improved turnover were mainly offset by THB translation and escalating bunker cost, the Group's Net Profit for Q208 improved slightly by 9% at THB688.3 million when compared to same quarter last year.

For the first six months of 2008, the Group's net profit slipped 4% to THB 1,213 million. The Group also recorded a Gain on Exchange amounted to THB216.2 million in H108 against a Gain on Exchange of THB48.2 million in H107.

For the three-month and six-month periods ended 30 June 2008 and 2007

1. General information

1.1 Corporate information

Regional Container Lines Public Company Limited ("the Company") was incorporated as a public limited company under Thai laws. The Company operates its business in Thailand and other countries in South China Sea and its principal activity is in the business of international vessel operations.

1.2 Basis for the preparation of the interim financial statements

These interim financial statements are prepared in accordance with Accounting Standard No. 41 (revised 2007) "Interim Financial Reporting", with the Company choosing to present condensed interim financial statements. However, the Company has presented the balance sheets, and the statements of income, changes in shareholders' equity and cash flows in the same format as that used for the annual financial statements.

The interim financial statements are intended to provide information additional to that included in the latest annual financial statements. Accordingly, they focus on new activities, events, and circumstances so as not to duplicate information previously reported. These interim financial statements should therefore be read in conjunction with the latest annual financial statements.

Basis of preparation

1. Thai Baht figures

The Thai Baht figures in the balance sheets as at 30 June 2008 and profit and loss accounts for the six-month periods ended 30 June 2008 and 2007 were extracted from the reviewed consolidated financial statements. The Thai Baht figures in the balance sheet as at 31 December 2007 were extracted from the audited consolidated financial statements. The consolidated financial statements included the financial statements of Regional Container Lines Public Company Limited (hereinafter called "the Company") and its subsidiaries in Thailand, Singapore, and Hong Kong.

For consolidation purposes, foreign currency financial statements of the subsidiaries were translated into Thai Baht at the closing exchange rates as to assets and liabilities, and at the average rates as to revenues and expenses. The resultant difference has been presented under the caption of "Translation adjustment" in the shareholders' equity.

2. <u>USD figures</u>

- 2.1 The USD figures in the consolidated balance sheets were determined by translating the Thai Baht consolidated balance sheets of the Group (except for two subsidiaries in Singapore, of which the functional reporting currency in USD) using the following exchange rates:
 - a) For assets and liabilities, we used the following approximate rates:

As of 30 June 2008 : USD 1 = Baht 33.5331 As of 31 December 2007 : USD 1 = Baht 33.7673

b) The approximate rates as of 1 January 1997 were used for broughtforward balances of share capital, share premium, investments, property, vessels and equipment:

For the Company and its Thailand subsidiary

USD 1 = Baht 25.5850

For its Singapore subsidiaries with functional currency reporting in Singapore dollar

USD 1 = SGD 1.4020

For its Hong Kong subsidiaries

USD 1 = HKD 7.7296

c) Approximate rates as at the transaction dates were used for additional share capital, share premium, vessels and equipment, and disposals of equipment.

Any differences have been included in "Translation adjustment".

2.2 The USD figures in the consolidated profit and loss accounts were determined by translating the Thai Baht consolidated profit and loss accounts of the Group (except for the two subsidiaries in Singapore, of which the functional reporting currency in USD) using the average exchange rates, which were as follows:

30 June 2008 :

USD 1 = Baht 32.3613

30 June 2007:

USD 1 = Baht 35.0420
